Description

The Lillys are actually a group of lamps shaped like a lily

The lamp has the shape of a lily and is built from different layers of wood, We often use Walnut wood for the outside and Birch wood for the inside. We use standard G4 lamp sockets so this can hold any 12V led lamp, dimmable or not depending on the powersupply on top. The cable is standard 2m long and we group them together on a plate of any size. If needed the length can be longer.

Diameter of 20 cm and a height of 13 cm.
